SIT 877 ELEKTRA

WULTIFUNCTIONAL CONTROL FOR GAS BURNING APPLIANCES

SIT 877 ELEKTRA

\mathbf{M} ultifunctional control for gas burning appliances

Application

- Gas appliances using premix burner with Elektra Combustion Management System and with automatic ignition
- Central heating boilers
- Combi boilers
- Instantaneous water heaters

Main features

- Two automatic shut-off valves
- Electrical modulator with low
- hysteresis
- High modulation range up to 1:50

Normative reference

EN 126 - Multifunctional controls for gas burning appliances

Functional Description

877 ELEKTRA is a multifunctional gas control with two direct acting automatic shut-off valves, a direct compensated pressure regulator and a modulator driven by linear actuator operated by a stepper motor. The result is a modulating characteristic with low hysteresis, the multifunctional control is therefore particularly suitable to be used in electronic gas-air ratio control systems. When the shut-off valves are de-energized, it is only possible to measure the inlet pressure on the inlet pressure test point (P_{IN}).

When the coil (EV) is energized the first valve (V1) and the second valve (V2) open and allow the gas to flow through the pressure regulator (PR).

The gas flow rate is function of the number of motor steps.

- 1. ON-OFF solenoid EV1 and EV2 terminals
- 2. Stepper motor terminals
- 3. Inlet pressure test point
- 4. Gas inlet
- 5. Gas outlet
- 6. Pressure regulator calibration screw

$\pmb{C} \text{onstruction } \pmb{C} \text{haracteristics}$

- Aluminum body
- Inline inlet and outlet
- Two automatic shut-off gas valves
- Inlet filter
- Inlet pressure test point
- Torsion and bending resistance group 1 according to EN 126

$U_{se} S_{pecification}$

- Mounting position _____ any position except coil upside-down
- Gas families _____ 2nd and 3rd
- Ambient temperature range ______ -15 to +70 °C
- Maximum inlet pressure _____ 60 mbar

$M \hbox{ echanical } C \hbox{ onnections }$

 Gas inlet and outlet 	 G 3/4 ISO	228
- Pressure test point	 Ø 9 mm	

$E_{\text{lectrical}} \; C_{\text{onnections}}$

- Automatic shut-off valves	Male connector Molex minifit 3 pin, see Figure 1
- Stepper motor	Male connector compatible to cable connector Stocko STO-GRID. MH 790-06-001-118, see Figure 2

Electrical Data

Automatic shut-off valves

- 22 VDC Pick & Hold
- 24 VDC
- 230 VRAC

Stepper motor

- Unipolar 24 VDC

Motor pinout

PIN	1	2	3	4	5	6
PHASE	A +	A COM	A -	B +	B COM	В -

Main Features

- Two automatic shut-off valves, silent operation (EV1, EV2)
- Pressure regulator (PR)
- Modulating device driven by a stepper actuator (MD)
- Inlet pressure test point (PIN)
- Inlet filter (FL)

FUNCTIONS

Shut-Off

- First automatic shut-off valve (EV1) class C according to EN 126
- Second automatic shut-off valve (EV2) class C according to EN 126

Modulation

- Continuous outlet flow rate modulation
- Modulating range 100 5000 l/h (d=1) @ 20mbar inlet pressure

Pressure Regulation

Direct compensated pressure regulator class C according to EN 126

${f T}$ he stepper motor acts the flow adjuster in accordance with the chart below

Flow rate curve with Pin = 20mbar @ 20°C
