

SIT AWARDED ITALGAS CONTRACT FOR 480,000 H2READY METERS

Padua, July 2, 2026 – MeterRSit, a SIT Group company and a leading developer and manufacturer of intelligent gas metering solutions, has been awarded a contract for the supply of 480,000 smart gas meters as part of a tender launched by Italgas.

The two-year agreement covers the assembly and supply of next-generation H2ready gas meters designed to transform the way energy is managed by utilities, cities and end users.

The advanced device, designed in-house by Italgas, has been developed to support the evolution of gas distribution networks, enabling the management of different types of gas, including hydrogen blends. Its deployment is expected to contribute to the adoption of renewable gases and, more broadly, to the energy transition.

“This agreement comes just over three months after a major contract award in the Netherlands and confirms our strong, stable and long-standing presence in the Italian market,” said Federico de Stefani, Executive Chairman of SIT Group. “By working alongside leading international operators, we are helping make the energy and digital transition increasingly tangible and effective.”

Through its Heating & Ventilation, Smart Gas Metering and Water Metering Business Units, SIT develops intelligent solutions for environmental control and consumption measurement, contributing to a more sustainable world. A multinational leader in its reference markets and listed on Euronext Milan, SIT aims to be a leading sustainable partner for energy and climate control solutions, with strong focus on the development and use of low-impact alternative gases.

The Group operates production sites in Italy, Mexico, Romania, China, Tunisia and Portugal, and has a sales structure covering all key global markets. SIT adheres to the United Nations Global Compact and its principles promoting responsible business practices. The Company is also a member of the European Heating Industry and the European Clean Hydrogen Alliance.
